The Sun

What was God in old times?

A very long time ago?

In the beginning?

What if the word God was

Another symbolic meaning for

Our nearest star the sun?

If God once was the sun

What would you then do?

If you where an atheist

Could you still be an atheist

And deny the sun?

If God once was an symbol

for the Sun?

Just think about for a while

We would get it a lot easier

To declare our belief in

The Lifegiver called the Sun

But it's so long ago

And it's so hard to prove

There would be no doubt
That denying the sun
Would be a missinterpreting
Of the sun himself
You can't deny the sun
Cause its always there in
All time until it's gone
To another shape
What if God Once was a symbol
For our nearest star the sun?
